## EDUCATION

| | | | |
|---|---|---|---|
| Sri Eshwar College of Engineering | **B.E (CCE)** | **CGPA 8(upto 3rd semester)** | **2022-2026** |
| Saratha International School | **HSC(CBSE)** | **89%** | **2020-2022** |
| Saratha International School | **SSLC(CBSE)** | **85%** | **2019-2020** |

## INTERNSHIP

**Java Development (Octanet)** **2024**

Java Swing project combines a to-do list manager with a timestamp calculator and password generator and also seamlessly manage tasks, calculate timestamps, and generate secure passwords within a user-friendly interface. Personalize your experience with customization options while ensuring compatibility and security Skills.

**Tech stack** Java

**Web Development** **2024**

Web Development (Trainee) 2024 Understanding & Implementing concepts of Web Fundamentals Developed some projects like Personal Portfolio, Expense Tracker. These projects showcase proficiency in Web-Development.

**Tech Stack** Node JS, React JS, Mongo DB, Express JS

**MERN Stack - Better Tomorrow** **2024**

Crafted a dynamic pet adoption web application for seamless pet searches. Users explore diverse pet listings based on preferences, accessing personalized recommendations and trending pets. The platform ensures secure data storage and enhances the pet search experience for both adopters and shelters, fostering efficient pet matching and adoption processes.

**Tech stack** Node JS, React JS, Mongo DB, Express JS

## PROJECTS

**Recipe Recommendation System** **2024**

Developed a recipe recommendation system using Java, Scene Builder, MySQL, and CSS. The project involved creating a user-friendly interface with Scene Builder, implementing a database to store recipe information using MySQL,and also designed the frontend using CSS.

**Tech Stack:** Java, Scene Builder, MySQL, CSS

**Pet Adoption Platform** **2024**

Developed a pet adoption platform, implementing user authentication functionalities such as signup and login pages. Established routing mechanisms to facilitate seamless navigation within the platform. Utilized a modern tech stack, including React for the frontend and [insert backend technology] for the backend, to create a user-friendly and responsive web application for pet adoption enthusiasts.

**Tech stack:** ReactJS, NodeJS, Express and MongoDB

**EXPENSE-TRACKER** **2024**

Project on developing an expense tracker, demonstrating proficiency in data management, user interface design, and financial tracking. The project highlighted the ability to deliver practical and efficient solutions for personal or business expense management.

**Tech stack:** React, Express, MongoDB

## CERTIFICATIONS

Certified in MySQL by Hacker Rank, demonstrating proficiency in database management. -Hacker Rank **2023**

Certified in Mastering Data Structures and Algorithms using C from Udemy – Udemy **2023**

## ACHIEVEMENTS

**Leetcode** Max Rating: **1212** | Best Rank – **8052** | Solved 80+ Problems | Profile

**Codechef** Max Rating: **1095** | 1 star rating | Best Rank – **1086** | Solved 100+ Problems | Profile

**Coding Ninjas** Solved 60+ Problems | Profile

**GSoC** Participated in Google Summer of Code 2024, proposing and developing a project titled Front-end and Adaptive Question Rendering' aimed at enhancing the user-friendliness of a clinical trial matching application. **2024**

## SKILLS

**Languages:** Proficient in HTML, CSS, JavaScript, Java, Python, C++

**Tools/Platform:** Worked with GitHub, Git, VS Code, IntelliJ

**Database:** Proficient in MySQL and MongoDB

**Frameworks/Libraries:** Worked with ReactJS, NodeJS, ExpressJS

**Core:** Knowledge in Data Structures and Algorithms, DBMS, OOPs
